**MANUFACTURER OF BICYCLE
ACCESSORIES FOR 140 YEARS**

WHY CUSTOMISE YOUR BOTTLES?

Easy to make and affordable, customised bottles can help you to promote your brand, your shop, your sports club... It could also be a great gift and souvenir for your race's attendees.

Flexible, ergonomic, tasteless and odourless, our water bottles offer comfort, strength and adjustable flow. Designed for both professional and amateur athletes, they combine performance and practicality, whether for cycling or team sports. Using a ZEFAL bottle is an environmentally-friendly gesture, avoiding the need to buy bottle water.

Z HANDLEBAR CAGE

Ref. 7018

79.95 €

UNIVERSAL FRONT HOLDER FOR BIKEPACKING DRY BAGS

The Z Handlebar Cage is a lightweight and rigid handlebar harness. It has been designed to solve common issues associated with bikepacking handlebar bags. Thanks to the space between the load and the handlebar, hand positioning remains comfortable and cables can be routed easily. The anti-rotation system ensures that the load stays secure without the risk of rubbing against the wheel.

The Z Handlebar Cage features an offset mounting area that can accommodate a light, GPS device, or phone on a 25.4 mm diameter tube over 100 mm (84 mm of usable space). If space is insufficient or if a three-prong mount is preferred, an adapter is included.

Both the support and the accessory mounting tube are designed as a single piece of reinforced technopolymer, giving the holster both strength and lightweight performance. The adjustable mounting system allows installation on all types of handlebars, regardless of their diameter (22.2, 25.4, 31.8 and 35 mm) or material (carbon, aluminum, steel, etc.).

UNIVERSAL Compatible with all round handlebars (22.2 ; 25.4; 31.8 and 35 mm), whether gravel or MTB, for easy installation on any bike.

FREES UP SPACE Its offset top bar allows you to easily mount accessories (light, GPS, phone) without cluttering the handlebar.

ROCK-SOLID STABILITY Thanks to its anti-rotation system, your setup stays perfectly in place, even on the most technical terrain.

ADJUSTABLE FIT Mounting clamps with a wide adjustment range ensure secure and customized installation on all handlebars.

3-PRONG MOUNT INCLUDED Attach your accessories using a simple, reliable and universal system.

Z ADVENTURE

DRY BAG 15L

Ref. 7117

44.95 €

WATERPROOF BAG FOR BIKEPACKING

The Z Adventure Dry Bag 15L is a waterproof bag designed to keep your belongings dry during your cycling adventures, whatever the conditions.

Featuring a dual opening with a roll-top closure, it provides easy access from both sides while allowing precise volume adjustment. This design improves organization and convenience, even on long-distance trips.

Made from a lighter material than the rest of the Z Adventure range, it helps reduce the overall weight of your gear while maintaining excellent durability. Its lightweight construction is designed to provide greater weight savings without compromising reliability in demanding conditions.

With a 15-liter capacity, this dry bag is ideal for carrying clothing, bivouac equipment, or moisture-sensitive gear.

It is particularly well suited for use with the Z Handlebar Cage, providing a stable and practical front-carrying solution. It can also be easily secured with straps to the platform of virtually any rear rack, such as our Raider Lite, ensuring outstanding versatility.

THE BIKEPACKING BENCHMARK, NOW IN BLACK.

Since its launch, our waterproof bikepacking luggage range has established itself as a reliable choice for riding with confidence, whatever the conditions. Originally available in red, it quickly gained recognition for its practicality, durability, and its ability to keep your essentials perfectly protected.

Building on this success, the range is now available in a new colorway: full black.

Clean and timeless, it blends seamlessly with any bike and any setup, while retaining what matters most: proven waterproof performance and a design built to last. The same reliability, the same high standards, and the same peace of mind.

WATERPROOF HANDLEBAR BAG WITH LARGE VOLUME

This universal handlebar bag is ideal for carrying light, large-sized items, such as a sleeping bag or a floor mat, in a way that evenly distributes the weight on the bicycle. With a 10-litre capacity, this completely waterproof bag can be easily attached and removed through the use of its self-adhesive straps. Equipped with reflective strips and an attachment loop for lights, the Z Adventure F10 can safely adapt to fit all types of handlebars.

LARGE CAPACITY Very large carrying volume.

DURABLE Durable material. Reinforced straps and mount.

LIGHTWEIGHT CARBON REAR RACK

The Raider Lite is a carbon rear rack, ideal for bikepacking enthusiasts looking for a hybrid setup that combines bikepacking bags with a rear rack — bringing together the best of both worlds. Thanks to its mounting system, it is compatible with all bikes equipped with threaded mounts and tyres up to 55 mm (2.35") wide. Once the ERA system has been installed, the rack can be mounted in less than five seconds.

Providing outstanding load stability, its clean yet functional design allows the use of both traditional luggage and MIK-compatible accessories on the top platform.

Finally, threaded mounting points on each side stay make it possible to attach bottle cages or cage-style mounts, such as the Z Adventure Cage, further enhancing its versatility.

OPTIMIZED LIGHTWEIGHT DESIGN Made from carbon, it combines strength and minimal weight, focusing only on what truly matters.

MODULAR The threaded side mounts allow you to easily attach bottle cages or cages like Z Adventure Cage to maximize your carrying capacity.

MIK COMPATIBLE MIK-ready platform for quickly and securely attaching and removing your accessories and bags.

ERA (EASY RACK ASSEMBLY) SYSTEM Assembly the rack in just a few seconds — simple and hassle-free.

REAR BAG WITH MODULAR VOLUME

The Z Traveler 80 is a rack bag designed for cyclists looking for ample capacity, whether for daily commutes or travel. This universal bag is easy to install thanks to its Velcro® fasteners and fits most bike racks, while ensuring good stability even when fully loaded.

Versatile, it offers an adjustable capacity ranging from 9 to 32 liters. Its main compartment, which can be expanded from 9 to 11 liters thanks to a gusset, allows you to quickly adjust the storage space. The two fold-out side panniers provide additional volume, ideal for carrying bulky items and better organizing your load. Designed for practical use, this bag easily transitions from a compact size to a large capacity suitable for multi-day adventures.

Also available in MIK version, allowing a quick installation and without settings on the racks equipped with this system.

WATER RESISTANT Rain cover included with practical storage underneath the bag.

RESISTANT MATERIAL Made from a highly resistant fabric.

UNIVERSAL MOUNTING For all types of pannier racks.

REINFORCED SIDE POCKETS The foldout side pockets are made from EVA shells.

TOOLS FREE No tools required for assembling.

REAR BAGS

The Z Traveler 40 is a rack bag designed to accompany cyclists on all their journeys, from everyday commutes to long trips. Versatile and easy to install thanks to its Velcro® fasteners, it fits most bike racks and ensures excellent stability, even on uneven roads. It has a 9-liter capacity, expandable to 11 liters thanks to a central gusseted pocket. Designed for practical use, it features an expandable rear pocket for carrying a water bottle. When zipped closed, it remains discreet and preserves the bag's compactness; when open, it offers a simple solution for keeping your water bottle accessible without cluttering the main compartment. The back of the bag is also equipped with loops on a sewn-in strap for attaching a light.

Also available in MIK version, allowing a quick installation and without settings on the racks equipped with this system.

EXTRA-LONG REAR MUDGUARD FOR MTB

The Zéfal Deflector RS90 is our top-performing rear mudguard, built to take on the very worst conditions. Designed for 27.5" and 29" MTB, whether electric or conventional, it's made for riders who won't let mud get in their way. Compatible with tyres up to 3" wide, its extra-long, wide profile offers outstanding protection for both bike and rider. The rubberised hook-and-loop strap system ensures a secure and hassle-free fit to the frame. Sitting close to the wheel and fully height-adjustable, it maintains ideal tyre clearance for maximum performance. Constructed from tough, impact-resistant technical plastic, it delivers a perfect blend of rigidity, durability and on-trail stability.

QUICK MOUNTING Easily and quickly fitted.

STABILITY AND ROBUST Reinforced plastic design and construction.

FRAME PROTECTION Soft pads and straps to protect paintwork.

FOR WIDE TYRES 27.5" / 27.5+ / 29" tyres up to 3".

REAR MTB MUDGUARD

The Deflector RM80 is a mountain bike mudguard that provides a high level of protection against mud and rear-wheel spray, thanks to its length and width specifically designed for modern bikes fitted with wide tyres up to 3".

Featuring a quick-release mounting system, it can be easily fitted to all types of seatposts. The hook-and-loop strap fastening system ensures secure retention, whatever the terrain. Its dual-adjustment articulation allows it to adapt to a wide range of hardtail and full-suspension mountain bike frame geometries. Its widened rear profile, combined with a reinforced technopolymer construction, makes it a robust and highly effective mudguard for everyday riding as well as mountain biking in demanding conditions.

COMPATIBLE 26" / 27.5" / 29" wheels, and tyres up to 3" wide.

HIGH-SECURITY FOLDING BIKE LOCK

The K-Traz F17 is our most robust folding bike lock model. It is made up of six articulated bars of 5.4 mm hardened steel and features a high-security key locking system. Its 85 cm length is ideal for securing your bike to a wide range of fixed objects. Highly durable, it is ART-2 certified, ensuring your bike is covered by most insurance companies. Fully coated in a protective plastic layer and fitted with soft rubber pads, it effectively protects your frame against scratches. Once folded, it can be easily stored in its mount, which can be fixed in various positions on your bike for safe and convenient transport. The lock is supplied with three keys and is covered by our key replacement programme in case of loss. This allows you to enjoy your journeys with complete peace of mind.

HIGH RESISTANCE Tensile and torsion strength. Antitheft and anti drilling.

EASY-TO-CARRY Its folding design makes it easy to store in its cover, which can be attached to bottle cage mountings or by straps.

DUST RESISTANT Protective lock cover included for enhanced durability.

PAINT PROTECTION Flexible plastic coating that helps reduce impacts and abrasion on the frame.

LOSS OF KEY SERVICE Duplication of keys in case of loss. Unique serial number.

POWERFUL FRONT LIGHT WITH TWO MOUNTING OPTIONS.

The Supervision F650 is a high-performance front light for bicycles, delivering 650 lumens to let you ride safely, day or night. Lightweight, compact, yet powerful, it fits easily on your handlebar thanks to the included multi-diameter mount. For optimal integration, you can use the included GoPro-style mount, allowing offset installation under your handlebar or GPS computer. Made of aluminum and IPX6 certified, this light is durable and resistant to water splashes. The single control button allows you to quickly navigate and select between the 5 available lighting modes: 3 steady modes (low, medium, high) and 2 flashing modes (breathing and daytime flash). See and be seen, whatever the weather and time of day.

CNC ALUMINUM HOUSING Lightweight and long-lasting performance thanks to optimized cooling.

AERO GoPro mount included for offset positioning and improved integration.

UNIVERSAL Fits most handlebars up to Ø 41 mm.

ANTI-GLARE A specially designed lens that prevents dazzling oncoming road users.

SIDE VISIBILITY Enhanced safety thanks to a wide light beam spread of over 305°.

FLOOR PUMP WITH AN EXTRA-LARGE PRESSURE GAUGE AND A Z-SWITCH INTUITIVE CONNECTION

The Zéfal Profil Max FP30 floor pump delivers efficient, fast and comfortable inflation for maintaining your bicycle. Manufactured from robust materials, it features a steel barrel and a wide steel base. The ergonomic handle and excellent stability make it easy to reach high pressures in just a few strokes. Its extra-large pressure gauge provides clear and accurate tyre pressure readings up to 11 bar. The long hose and Switch connector, compatible with both Presta and Schrader valves, ensure easy tyre inflation whether your bike is standing on the ground or mounted on a work stand.

Z-SWITCH SYSTEM Universal connection head compatible with Presta, Schrader and Dunlop valves with a simple sliding action. An intuitive and ergonomic system ensuring a secure connection thanks to the "finger pinch protection" locking lever.

ADDED FEATURES Ball and bladder heads.

ALUMINIUM TUBELESS VALVES

LIGHT ALUMINIUM PRESTA TUBELESS VALVES

The Zéfal Presta tubeless valve combines light weight, strength and ease of use to improve your tubeless riding experience. Carefully designed by our R&D team in France, it is made from precision CNC-machined 6061 aluminium for excellent durability and reliability. Available in three lengths (44, 60 and 80 mm), it fits most MTB, gravel and road wheels, in aluminium or carbon, compatible with Tubeless and Tubeless Ready tyres.

The valve can be installed quickly and without tools thanks to its ergonomic hand-tightening nut. The valve cap also includes a valve core remover tool to make maintenance and tubeless sealant filling easier.

Its gloss black anodised finish, inside and out, provides long-lasting protection while helping the tubeless sealant flow more easily by reducing particle build-up inside the valve.

To help protect carbon rims, a flat seal is positioned under the nut to reduce friction and ensure an airtight fit.

Offering optimized airflow, this valve is compatible with all floor pumps and hand pumps fitted with a Presta connection.
